## Natural Spring At Home

Classic • Perfect • Versatile

Diamond Classic, a stylish designer water system, providing clean and close-to-natural mineral water 24/7 at home. With Diamond, your family and you can enjoy iceberg-pure and 100% safe drinking water at home with just one press. It's stylish, yet natural.

Diamond Classic  
Generating Perfect Water with  
Cutting Edge Technology and  
Essential Benefits For You

High Quality,  
Pure Natural Energy Minerals -  
Brand-new 「Diamond 3000」  
Natural Energy Ceramic Beads

Diamond,  
as a human-oriented  
pioneer in the industry, never  
stops pursuing perfection

We designed Diamond Classic for the pursuit of perfect water. Through the advanced technology, its six-filter patented design combines with natural energy ceramic beads made of ancient mineral stones, nano silver activated charcoal and other natural substance. The result is clean, safe, impurity-free Health Water which is comparable to ancient limpid water.

With the aim to improve the efficiency of filters, natural energy mineral stones are employed to make the latest exquisite 「Diamond 3000」 Natural Energy Ceramic beads. These stones are long used in ancient time as a filter material. With its release of natural magnetic energy, water will be activated, resulting in an increase in oxygen content. The amount of beneficial trace elements such as magnesium, iron, potassium, fluorine and calcium will also increase, turning the water into body-friendly mild alkaline. With all these merits, Diamond Classic turns tap water into clean, pure and beneficial Health Water. Drinking Health Water constantly helps detoxification, gradually improves metabolism and the health of you and your family.

After years of research and over 50 improvement, Diamond Classic with reformed and thoughtful design, operation and maintenance have never been so effortless:

#### Minimal Filter Replacement Procedure

Hidden one-touch pipes and refined filter design means replacement of filters is much easier than before.

#### Repollution-proof Filters

Filters no longer consist of pipes and lids, therefore preventing repollution during filter replacement or maintenance procedure.

#### Two-way Diverter

Brand-new two-way diverter which enable the user to swap between TAP WATER and DIAMOND WATER, or simply stop the water.

#### Filter A Air Release Button

This well designed pressure plug facilitates the release of water inside the filter, thus preventing the water pressure.

#### Lai-Kit Chan
